Architect

Ford, Powell, & Carson

Urban Design Group
RTKL
General Contractor
Manhattan
Marriott

Project Scope:

Marek did the drywall and acoustical on this project in 1987-88, working directly for the Marriott corporation on the hotel and Manhattan at the mall. In this case, Marek's capacity and ability perform was crucial to the success of the project. A 38 story hotel tower, high end conference center, and a 4 story mall being constructed simultaneously. This project was one of our first large projects in San Antonio and helped establish Marek as the "go to" drywall/acoustical subcontractor in South Texas.
